PRODUCTS

High speed Interceptor (ULKA)

To defend against attack from enemy helicopters and Kamikaze drones. Essentially an electric surface to air missile

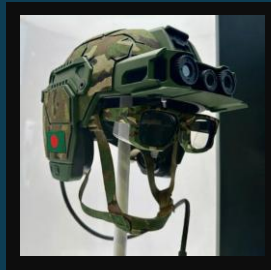

Tail-sitter Delivery Drone (MEGHDOOT)

Delivering emergency medical supplies with longest range. No dead-weight like typical VTOL aircraft. Take off and land like helicopter and cruise like a plane

Smart Helmet (BAGRO-Vision)

Arms soldiers with the eye of the tiger. Advanced augmented reality headset/helmet that gives real-time situational awareness to soldiers in the battle-field.

Precision Targeting System (SHIKRA)

User friendly targeting system with enhanced target recognition. Minimizes probability of collateral damage. Indexing system numbers targets for operator to easily choose from.

Bangla Voice Command Drone (ACHARJO)

Easy to use voice command system for Bengali speakers. Allows for hand-free use of drones. Useful in several civil and military applications
